Concerts Trip, by Crazy Group

User Manual

Overview

'Concerts Trip' is the perfect application to help you plan a customized music-tour, based on your preferences.

In 'Concerts Trip' you can select when (dates), where (city/country/continent), what (genres) will be your next musical adventure.

You can be strict or flexible with either of those terms, plus - you can select who you 'Must see' in your dream-trip!

As we know it might be overwhelming at first, we decided to give you some recommendations, just to help you get started. If you want, you are welcome to review them on our home-page.

Once you put in your preferences, we will display the best-matching shows for you. You can then select which concerts will qualify to your exclusive-tour. We will summarize all the details you need to know, including links to buy tickets.

So what are you waiting for? get your own customized concerts trip!

Application screens

'Concerts Trip' Home-page

First, you can get recommendations on what's hot in different locations, based on *Number of shows / Performing Artists' Followers / Genre*.
Clicking on any of them will pop-up a window with suggestions for you, if you need some ideas of what to look for.

For example *Number of shows* :

Then, you are welcome to insert details through the next stages:

1. **Trip Dates -** select a range of dates which you want the trip to be in.

   If you are not limited with time you can also select the *'I always want to travel'* checkbox.
   Only once you've selected a date (or checkbox) you can move to the next step.

2. **Genres -** select your favorite types of music.
   This filter will be available only once you finished with step 1.
   A dropdown is offered, with the most popular genres at the moment.
   You can also type your own preference - an auto-complete will guide you which genres
   are available right now.

   All available data is based on the dates you picked up in stage 1.

   *Note - if you changed the dates after selecting new genres, and there are no concerts
   for those genres in the new dates, an error-message will pop-up:

3. **Locations -** Select where do you wish to travel.
   This filter will be available only once you finished with step 2.
   A dropdown is offered, with the cities that have the biggest amount of concerts.
   You can also type your own preference - an auto-complete will guide you in which places
   there are available concerts right now.

All available data is based on the dates you picked up in stages 1 & 2.

*Note - If you change your *'Genres'* selection after selecting locations, those locations
will be automatically removed, to allow you a selection of only relevant locations to your
new genres.

4. **Must See -**
   Here you can mention if there is a specific artist / player that you want to include
   in your tour, regardless of the other parameters.

That's it!

You can select whether to *'include warm-up shows'* using the checkbox.
Once you've selected your filters, you are welcome to click *'Submit!'*

Now let us do the work for you :)
We will aggregate the data for you and forward you to the next page.

'Suggested concerts' page

Suggested Concerts

Filter according to a keyword (e.g. songwriter): [   ] [Filter]

[I'm Done]

[Start Over]

In this page we present you all the available concerts based on your search.
You can checkbox the ones you are interested to attend.

*Note - your *'Must see'* artists, if you chose any, will be displayed on top of the list,
Then all other concerts, ordered by dates.

There is an available option for you to filter-out some more, and get a more exact type of
concerts, by using the *'Filter according to a keyword'* filter at the top of the page.
Just type what you are looking for (e.g 'first album', 'songwriter') and your current results will be
filtered by your keyword, based on the artists and venue descriptions that we have.
You can also unfilter using the *'unfilter'* button that will appear when filter is enforced:

[Unfilter]

Click *'I'm Done'* once you've finished selecting your concerts,
and you will be forwarded to the next page.
You can also click *'Start Over'* if you want to try and assemble a different search.

'Results' page

Results
